

Foundations of Special Learning Needs

The newly created **Foundations of Special Learning Needs** focuses on informal assessments and instructional strategies to address special learning needs and effective instructional practices for all.

This hybrid training will meet once in-person for a half day and will contain 2 online training components with application exercises. The Foundations training, as well the Institute to Credential Special Learning Needs Resource Specialists, are part of the ICCB Instructional Staff Professional Pathways for Special Learning Needs.

Successful completion of the Foundations training will provide credit towards completion of the Institute. Foundations training can also be completed as a stand-alone module.
